

Modeling Report

Camas

Model date: July 2, 2025

M3Works

Model to station comparisons are a comparison of 50 meter cells to a point within the basin. Some differences are expected when comparing modeled and measured snowpack behavior at these different spatial scales. ASO 3m snow depth measurements at each station are indicated by the red '+' symbols. Absence of these symbols indicates that the station location or data quality are suspect, and they were not used in the ASO survey validation and report.

Station compare Snow Depth (in.)
Camas Creek Divide
(382:ID:SNTL) 5713 ft.

Fig.1 Comparison of modeled and measured Snow Depth [in.]. Comparisons of model pixels to measured station data are performed with the 9 nearest model pixels to give a more spatially complete view of model behavior.

Station compare Snow Water Equivalent (in.)

Camas Creek Divide
(382:ID:SNL) 5713 ft.

Fig.2 Comparison of modeled and measured Snow Water Equivalent [in.]. Comparisons of model pixels to measured station data are performed with the 9 nearest model pixels to give a more spatially complete view of model behavior.

Station compare Snowpack Density (Kg/m³)

Camas Creek Divide
(382:ID:SNTL) 5713 ft.

Fig.3 Comparison of modeled and measured Snowpack Density [Kg/m³]. Comparisons of model pixels to measured station data are performed with the 9 nearest model pixels to give a more spatially complete view of model behavior.

Model Description

Modeled data is generated using the M3 Works model framework BOREAS, which is the next generation of the Automated Water Supply Model (AWSM). Underlying forcing data is sourced from the High Resolution Rapid Refresh model (HRRR). BOREAS simulates the snowpack state using the physically based, distributed energy and mass balance snow model, iSnoBal. This report is brought to you by the team at M3 Works: Mark Robertson, Micah Johnson, Micah Sandusky, Christina Aragon, and Andrew Slaughter. More information about M3 Works can be found at m3works.io.

Additional Details

Total Snow Water Equivalent values (TAF) on 2025-07-02

ELEVATION RANGE	TOTAL
-----------------	-------

Accumulated Total Surface Water Input values (TAF) from 2025-07-01 to 2025-07-02

ELEVATION RANGE	TOTAL
4000 - 4999	0.0
5000 - 5999	0.0
6000 - 6999	0.0
7000 - 7999	0.0

Change in Total Snow Water Equivalent values (TAF) from 2025-07-01 to 2025-07-02

ELEVATION RANGE	TOTAL
-----------------	-------
